

Cloud Computing services

The Premier Cloud

The Premier Cloud - use as you need, pay as you use

What is Cloud Computing?

Cloud Computing is a highly scalable, cost-effective, on-demand hosting solution that enables you to store and access your systems online. With a cloud infrastructure there is no need to purchase expensive hardware, or spend time and money maintaining and updating it. All the resource you need is already available, and you only have to pay for what you use.

What can Premier IT do?

As a highly experienced IT solutions provider, we understand the importance of maintaining flexibility across your systems, particularly in such a technologically evolving world. We work with our clients to ensure that they get the most from their infrastructure and investment, while maintaining as much flexibility as possible.

We can offer a fully customisable, personal service, enabling you to pick and choose the products and services that are right for your organisation. Any or all of your business applications can be hosted using our extensive range of cloud services, in the Premier Cloud:

Why make the jump to the cloud?

- **Reduced cap-ex**
- **Easily scalable**
- **Simplified management and support**
- **Highly resilient**
- **Resource efficient**

Premier Cloud services

Hosted Exchange – access email anywhere, any time, and enable remote working

Disaster Recovery (DR) – safeguard your data and your people with a full business continuity plan

Virtual Private Server (VPS) – your own dedicated, fully managed environment within the Premier IT cloud

Online Backup - fast, secure and reliable way to back up business critical data

Virtual Office – run all your user desktops from our virtual infrastructure for instant return on investment

Why use us?

- **Entirely independent**

Our independence from third parties gives us the freedom to recommend the best solution to meet your requirements, regardless of brand. Our sophisticated infrastructure enables us to react instantly to your organisation's requirements

- **99.99% uptime guaranteed**

The Premier Cloud has a demonstrable track record. In 2009 we delivered 100% uptime to our clients – that means no downtime. At all. It is this reliability that enables us to guarantee a minimum uptime of 99.99% – no more than 52 minutes of downtime per year!

- **Long-standing, established company**

We have a long-standing, successful trading history within the IT industry, giving you the peace of mind and security you need from your IT partner. We can use our extensive experience to make informed recommendations on proven strategies and technologies

Want to know more...

Our extensive range of cloud services are currently being used by a number of clients in London and across the UK.
