

Hosted Exchange

The Premier Cloud

Hosted Exchange - your data in safe hands

What is Hosted Exchange?

Hosted Exchange is a flexible, cost-effective service that enables your organisation to use the Microsoft Exchange server platform, without having to purchase, maintain or update costly hardware.

Email is the communications lifeblood of most organisations. Microsoft Exchange is the most widely used business messaging and communications platform in the world, and the latest edition is the most flexible and feature-rich to date. Hosted Exchange is an efficient way to take advantage of all the features of Microsoft Exchange Server.

What can Premier IT do?

As a highly experienced IT solutions provider, we understand the importance of maintaining flexibility across your systems, particularly in such a technologically evolving world. We work with our clients to ensure that they get the most from their infrastructure and investment, while maintaining as much flexibility as possible.

Our flexible, reliable Hosted Exchange solution can be deployed rapidly, enabling you to benefit instantly from your investment. We can host your Exchange platform either through the Premier Cloud, or physically in our secure co-location centre.

Why Hosted Exchange?

Hosted Exchange allows you to:

- access email, calendar and contacts from anywhere, and at anytime
- allow your employees to work remotely
- reduce administration with fixed, monthly costs
- reduce capital expenditure
- reduce your carbon footprint
- eliminate maintenance downtime

What does our Hosted Exchange service include?

We can offer a fully customisable, personal service that includes:

- access to an unlimited number of mailboxes, contacts and calendars
- archiving of emails
- anti-virus and anti-spam software
- management of all Microsoft licensing and compliance
- fully managed and automated disk backup solution
- use of a secure, enterprise-class data-centre for optimal performance

Why use us?

• Entirely independent

Our independence from third parties gives us the freedom to recommend the best solution to meet your requirements, regardless of brand. Our sophisticated infrastructure enables us to react instantly to your organisation's requirements

• 99.99% uptime guaranteed

The Premier Cloud has a demonstrable track record. In 2009 we delivered 100% uptime to our clients – that means no downtime, at all. It is this reliability that enables us to guarantee a minimum uptime of 99.99% – no more than 52 minutes of downtime per year!

• Long-standing, established company

We have a long-standing, successful trading history within the IT industry, giving you the peace of mind and security you need from your IT partner. We can use our extensive experience to make informed recommendations on proven strategies and technologies

Want to know more...

Our extensive range of hosted services is currently being used by many of our clients, both in London and across the UK.
